· **General notes:**

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water.

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Must not reach sewage water or drainage ditch undiluted or unneutralised.

Throwing away bigger amounts into drains or aquatic environment may lead to decreased pH-values. A low pH-value harms aquatic organisms. In the diluted product use, the pH-value is considerably increased, so that after the use of the product the aqueous waste, emptied into drains, is only slightly polluting for water.

SECTION 13: Disposal considerations

· **13.1 Waste treatment methods**

· **Recommendation :**

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

· **European waste catalogue**

HP8 Corrosive

· **Uncleaned packaging:**

· **Recommendation:** Disposal must be made according to official regulations.
